			Going Concern		Gone Concern
			CET1 Trigger	Loss absorption Mechanism	Loss absorption Mechanism
 Japan	Yes	No	5.125%	Temporary write-down (TWD)	Contractual write-down (Specified item 2 measures)
 UK	No (injection available only after AT1 / Tier 2 bail-in)	Yes	7% ²	Conversion ³	Statutory ⁴ Write-down or Conversion
 EU	No (injection available only after AT1/ Tier 2 bail-in)	Yes	at least 5.125% ⁵	TWD or Conversion	Statutory ⁴ Write-down or Conversion
 Switzerland	No (injection available only after AT1/ Tier 2 bail-in)	Yes	7% for G-SIBs	Write-down or Conversion	Contractual Write-down or Conversion
 Australia	No (injection available only after AT1/ Tier 2 bail-in)	Yes	5.125%	Conversion	Contractual Write-down or Conversion
 USA⁶	No	N/A	N/A	N/A	Statutory Write-down or Conversion

1. It is uncertain which measures will be taken in a given case, and orderly resolution measures may be applied without implementing a pre-emptive capital injection. 2. Some issuers have stipulated 7% trigger as contractual base so that they could add their AT1 capital into the numerator of their leverage ratios. 3. The loss absorption mechanism of most of the AT1 securities in the UK is equity conversion, hence such securities do not have a write-up provisions. 4. Bail-in acknowledgment clause for effectiveness of statutory loss absorption, if the AT1 is governed by foreign law. 5. 7 or 8% in some countries. 6. US typically do not have trigger, loss absorption mechanism or write-up provisions applicable to debt securities as AT1 securities are generally preferred securities

HoldCo - OpCo Bank Rating Comparison

Credit Ratings of Selected G-SIBs¹ (as of Apr-24)

- Japanese G-SIBs' HoldCo obtained the highest ratings among G-SIBs peers by Moody's and S&P. These ratings are assumed to be based on their view of a likelihood of regulatory actions with pre-emptive capital and/or liquidity support by Japanese Government in the emergent situation.

HoldCo – OpCo Bank Rating Difference

Multiple requirements prior to PoNV

- Mizuho FG will be required to meet various capital requirements before reaching a point of non-viability (“PoNV”).

1. As of Mar-24. 2. PoNV will be deemed to have been reached when the Prime Minister of Japan, following deliberation by Japan's Financial Crisis Response Council pursuant to the Deposit Insurance Act (“DIA”), confirms (nintei) that “specified Item 2 measures (tokutei dai nigo sochi)”, which are the measures set forth in Article 126-2, Paragraph 1, Item 2 of the DIA, as then in effect, need to be applied to a financial institution if and when its liabilities exceed or are likely to exceed its assets, or it has suspended or is likely to suspend payment of its obligations. 3. Excl. countercyclical buffer.

* It is uncertain which measures will be taken in a given case, and orderly resolution measures may be applied without implementing a pre-emptive capital injection.

Illustration of Resolution Framework under the Deposit Insurance Act of Japan

- An orderly resolution¹ is expected to commence subsequent to the occurrence of Point of Non-Viability (PoNV) after the ultimate holding company in Japan (Domestic Resolution Entity) absorbs losses incurred at its Material Sub-groups²
 - Systemically important assets and liabilities, which are expected to include Material Sub-groups' shares, will be transferred to a newly created Specified Bridge Holding Company, while TLAC senior bonds of Domestic Resolution Entity (Non-viable Holding Company (Non-viable HoldCo)³) are expected to remain at the existing Non-viable HoldCo in Japan to be liquidated in bankruptcy proceedings
- Non-viable HoldCo's TLAC senior bondholders may incur losses depending on the final recovery value in bankruptcy proceedings of the Non-viable HoldCo
 - At PoNV, Basel III-eligible AT1 and Tier 2 instruments will be permanently written off, which would affect the final recovery value

A Model of Procedures of Orderly Resolution under the Single Point of Entry (SPE)⁴ Strategy in Japan

(Based on Annex to Japan FSA's Policy as of April 13, 2018)

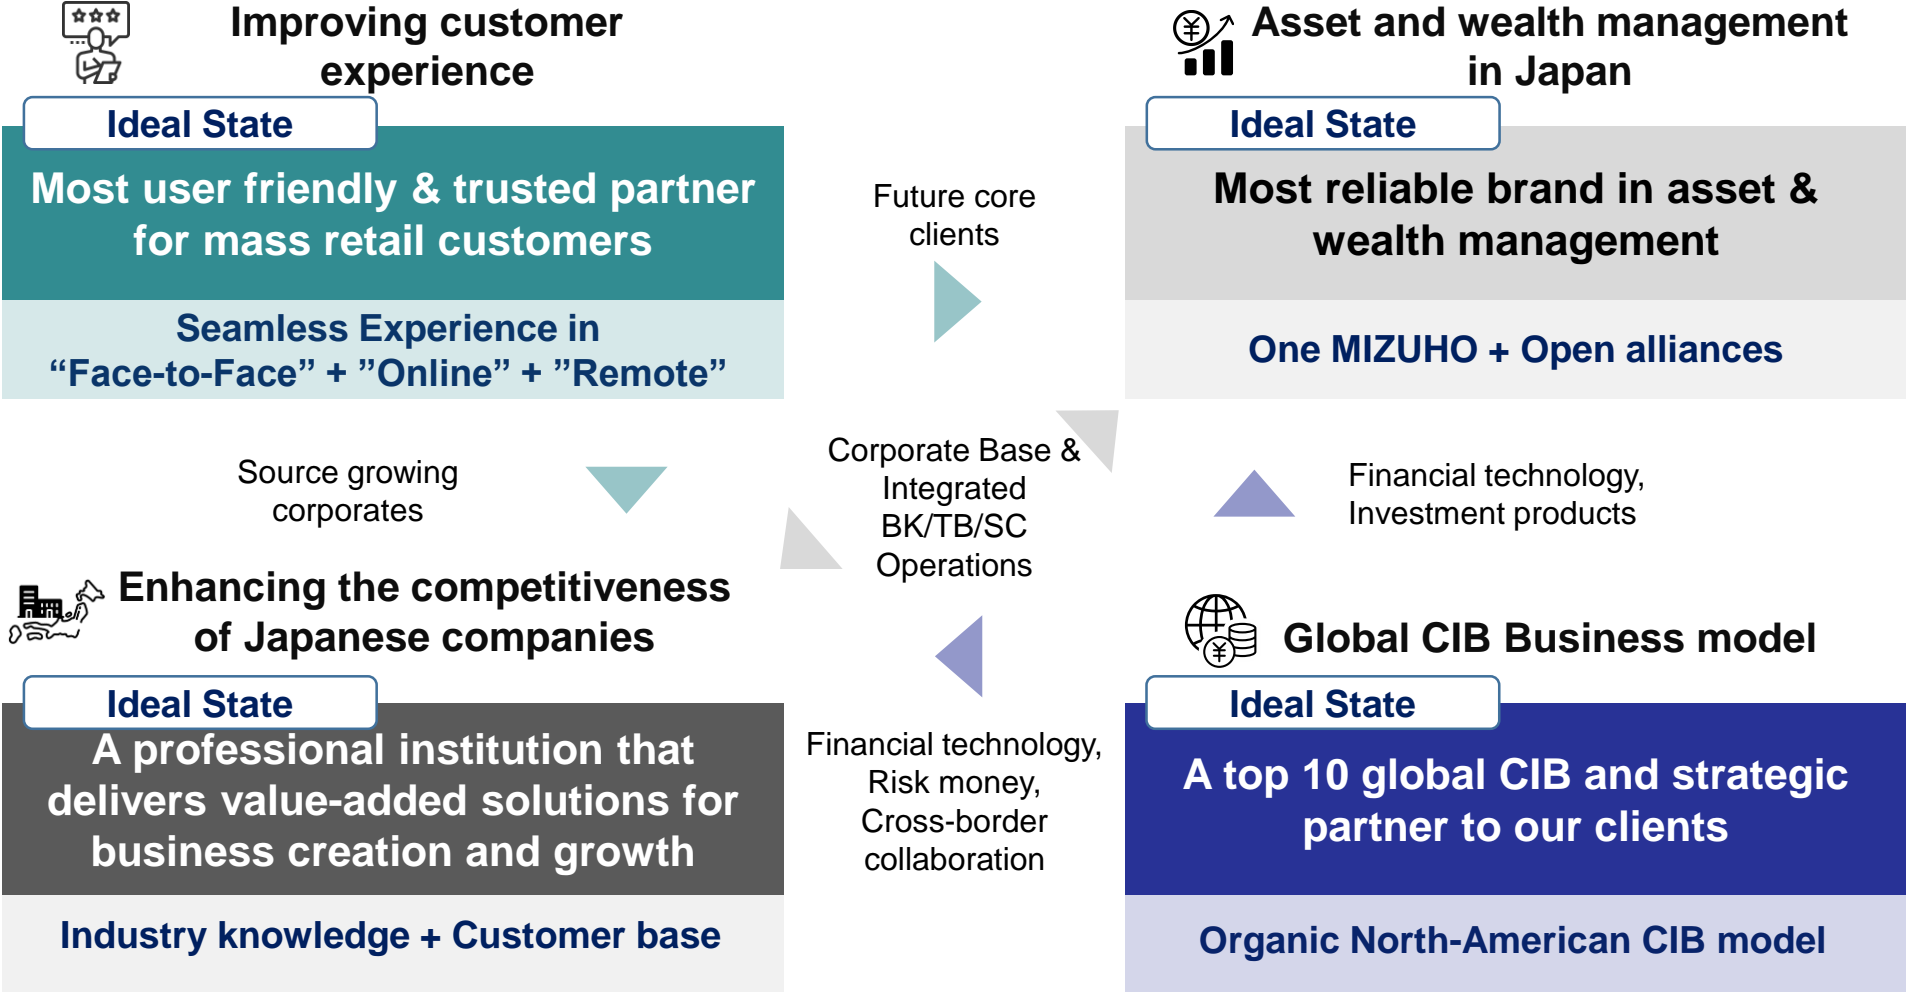

1. Based on a possible model of the resolution under the SPE resolution strategy in Japan as stated in Japanese TLAC Standard. 2. Domestic Resolution Entity's Sub-group or subsidiary that are designated separately as systemically important by Japan FSA or that are subject to TLAC requirement or similar requirement by the relevant foreign authority. 3. With respect to the Domestic Resolution Entity after absorbing losses of the Material Sub-group, the Prime Minister confirms the necessity to take "specified item 2 measures" as set forth in Article 126-2, paragraph 1, item 2 of the DIA, and issues an Injunction Ordering Specified Management as set forth in Article 126-5 of DIA. Such Domestic Resolution Entity is referred to as the Non-viable HoldCo. 4. Japan FSA's basically preferred resolution strategy in which resolution tools are applied to the ultimate holding company in Japan by a single national resolution authority. However, it is uncertain which resolution strategy or specific measures will be taken in a given case, including whether or not the SPE resolution strategy is to be chosen and implemented in a given case. 5. Basel III eligible.

Progress in business focus areas

Target business model

- Deliver unique strengths by enhancing each business focus area, and creating “synergies” among our businesses

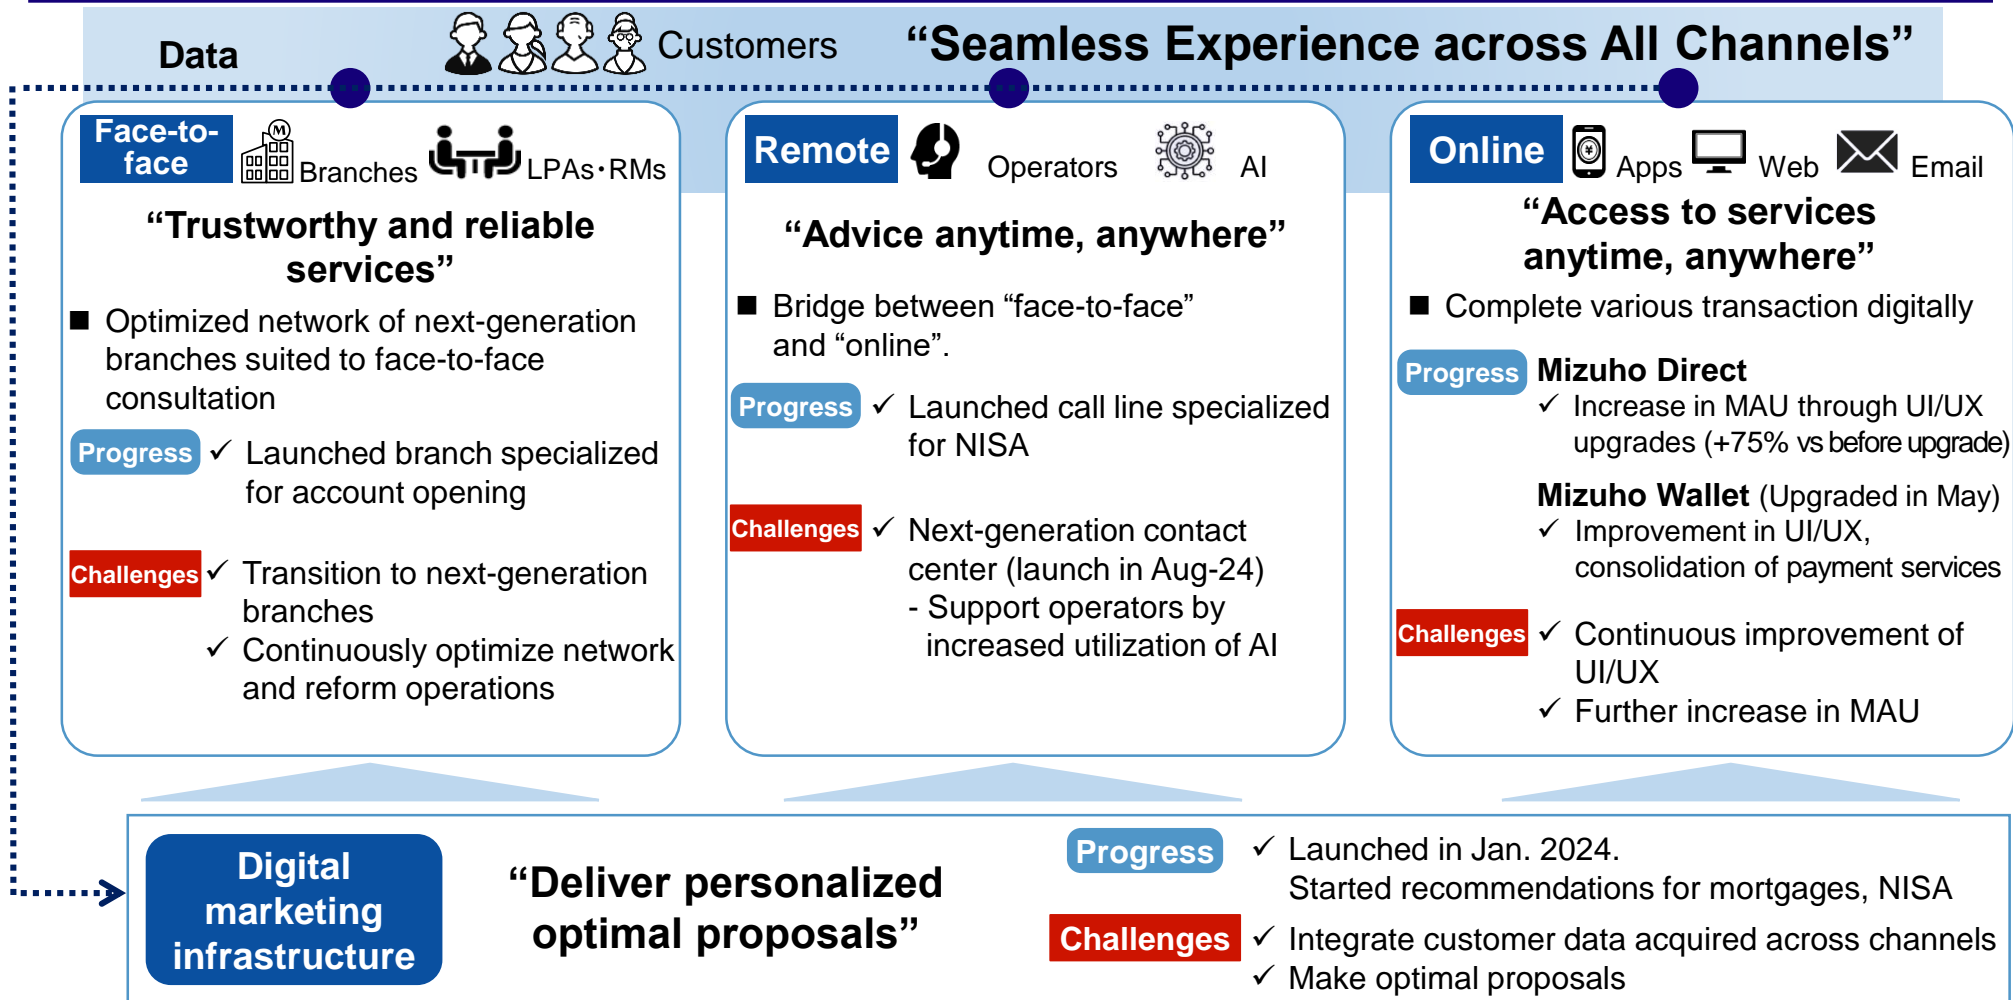

Sustainability & Innovation

Improving customer experience (1)
